Dear Valued Customer,

European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) and the European Chemicals Agency (ECHA) published candidate list for Substances of Very High Concern (SVHC) requires that manufacturers identify and communicate to customers whether certain substances are contained within their products. As of January 15, 2018, there are 181 substances listed as a SVHC.

Based on information provided to Palm Labs Adhesives by its raw materials suppliers, as well as a thorough inventory conducted of chemicals used in the manufacture of its products we do not believe any of the SVHC items are present at or above their reportable quantities in our formulations.

I declare that the above information is accurate and true to the best of my knowledge.

Ryan McShane
