**TURBO FUSE SERIES 110 – LOW ODOR/LOW BLOOM
(5 Viscosity)**

Palm Lab's cyanoacrylate is a one component rapid bonding adhesive. TURBO FUSE SERIES 120 LOW ODER advanced formula is designed to polymerize instantly by absorbing surface moisture. The product's performance has been tested with a variety of materials, and is recommended for a multitude of applications. The fast curing qualities make it especially desirable in high speed industrial production. Turbo Fuse is ideal for use in applications that require good "wicking" characteristics and/or in close fitting applications. The Low Odor/Low Bloom formula is widely used in the Aerospace, Automotive and Electronic industries.
